PULKIT CHOPRA

B.Tech CSE Student | Software Developer

Delhi, India | +91-7982864125 | pulkitchopra2007@gmail.com | github.com/pulkit-phoenix31 | linkedin.com/in/pchopra3112

OBJECTIVE

Motivated B.Tech Computer Science student and software developer with two years of freelance experience, passionate about building intelligent systems, automation tools and scalable backend services. Seeking a software engineering role in AI systems, backend development and modern web development.

EDUCATION

Maharishi Dayanand University, Rohtak 2025 – Present
Bachelor of Technology – Computer Science Engineering CGPA: 7.9

Delhi Technological University, Delhi 2024 – Present
Bachelor of Science – Artificial Intelligence & Cyber Security CGPA: 8.7

Air Force Sr. Sec. School, Delhi Cantt
Class XII (2023–24): 89.3% | Class X (2021–22): 93%

EXPERIENCE

Freelance Software Developer – Self-Employed 2 Years
Remote

- Developed independent software and web-based solutions for clients.
- Built backend APIs and web applications using modern technologies.
- Managed the full project lifecycle, including development, debugging and deployment.

Intern – Aquatech Jun – Aug 2024
Delhi NCR

- Assisted with technical tasks and gained exposure to real-world workflows.
- Learned about professional development environments and industry practices.

PROJECTS

AutoResQ – Emergency Accident Alert System (GitHub) 2023 – Present
Node.js, Express.js, Socket.io, JWT, PostgreSQL, Supabase, React, Tailwind CSS, Leaflet

- Built a full-stack system that detects vehicle accidents and alerts emergency services; accidents are simulated from a mobile app with GPS capture.
- Developed backend APIs in Node.js and Express.js; integrated PostgreSQL and Supabase to store accident, vehicle and owner data.
- Built three real-time EMS dashboards (Hospital, Police, Ambulance) with Socket.io alerts and a live Leaflet map of accident locations.
- Implemented JWT role-based authentication for Hospital, Police, Ambulance and Admin users, plus automated emergency alert workflows for faster response.

Arrc – AI Virtual Assistant 2025
Node.js, TypeScript, Electron, Python, PowerShell, Twilio, Claude, open-source LLMs

- Built a JARVIS-level AI assistant that controls and manages the desktop and carries out daily computer tasks.
- Added phone-call control: commands given over a call (Twilio with speech-to-text and text-to-speech) are executed on the desktop.
- Powered by Claude and local open-source models; desktop actions run through PowerShell/shell commands and Python scripts inside an Electron app.
- Implemented command-based automation and workflow coordination on a Node.js and TypeScript backend.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Golang, C++
Frontend: React, HTML, CSS, Tailwind CSS, Motion, Leaflet
Backend: Node.js, Express.js, REST APIs, Socket.io, Authentication (JWT)
Databases: PostgreSQL, Supabase
AI & Automation: Claude (Anthropic), open-source LLMs, speech-to-text / text-to-speech, desktop automation
Tools: Docker, Linux, Git, GitHub, PowerShell, Electron, Twilio

INTERESTS

Artificial Intelligence, Backend Systems, Automation, Open Source
